

Analyzing Microtrends within Savills' Real Estate Data

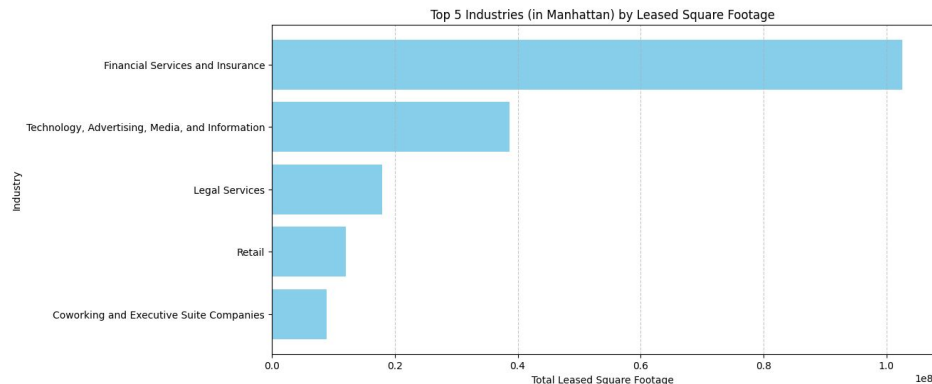

Team Chi-Squad (University of Rochester):

Sreejato (Sree) Chatterjee, Shubhranshu (Dew) Dutta, Aryan Raj Dhawan, Michael Ding, Johnathan Lee

New York (Manhattan) is the best region to invest for Commercial Real Estate

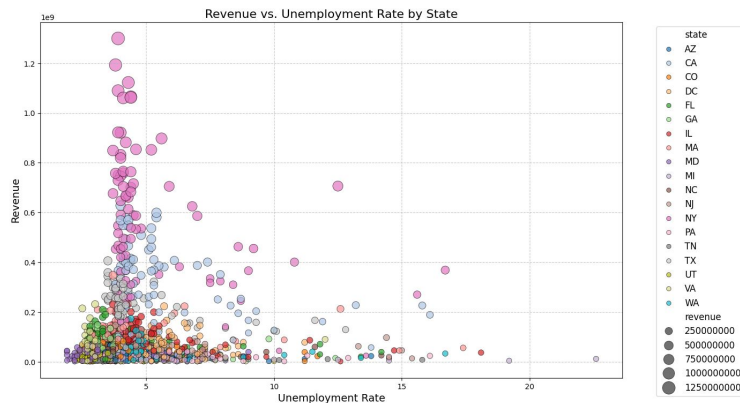

Highest LeasedSF of all markets

Finance is most leased industry in Manhattan

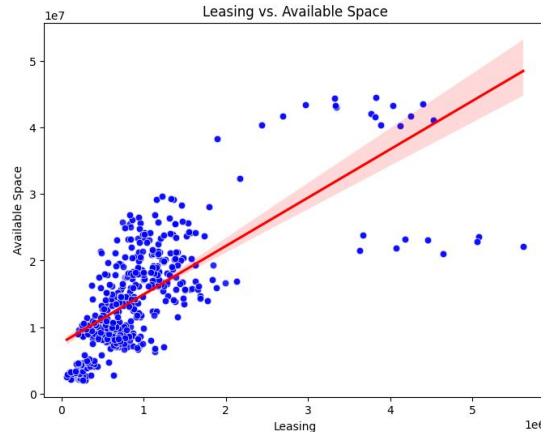

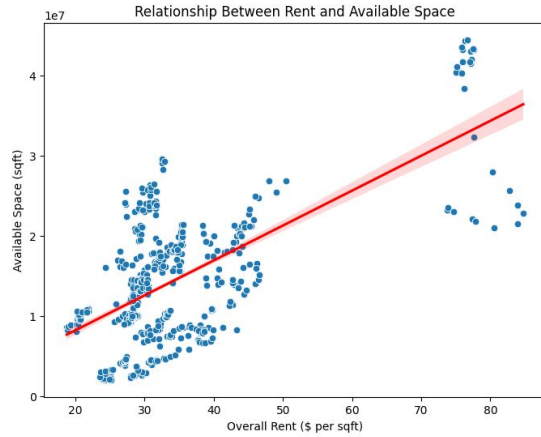

NY state data shows particular concentration of revenue around low unemployment and high revenue

$$\text{Revenue} = \text{leasedSF} \times$$

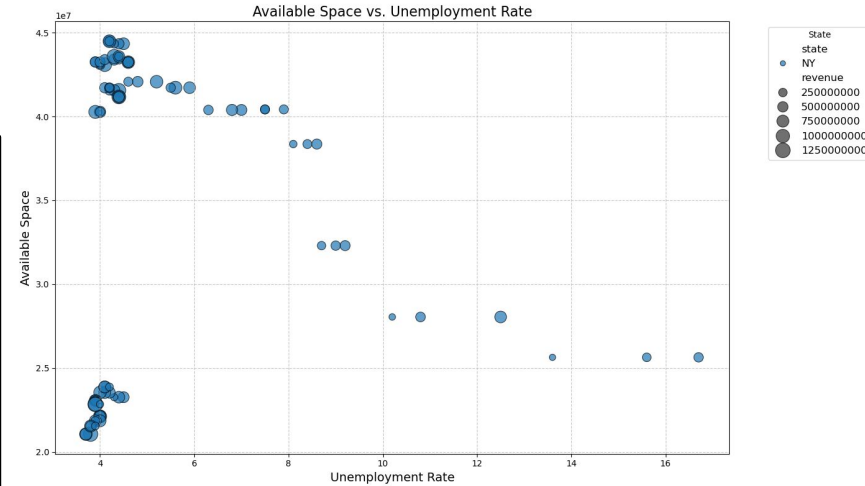

$$\begin{cases} \text{internal_class_rent,} & \text{if internal_class} = 'A' \\ \text{overall_rent,} & \text{otherwise} \end{cases}$$

Linear Regression Analysis of Available Space: Positive Association w/Rent & Leasing, Negative Association w/Unemployment Rate

Savills should:

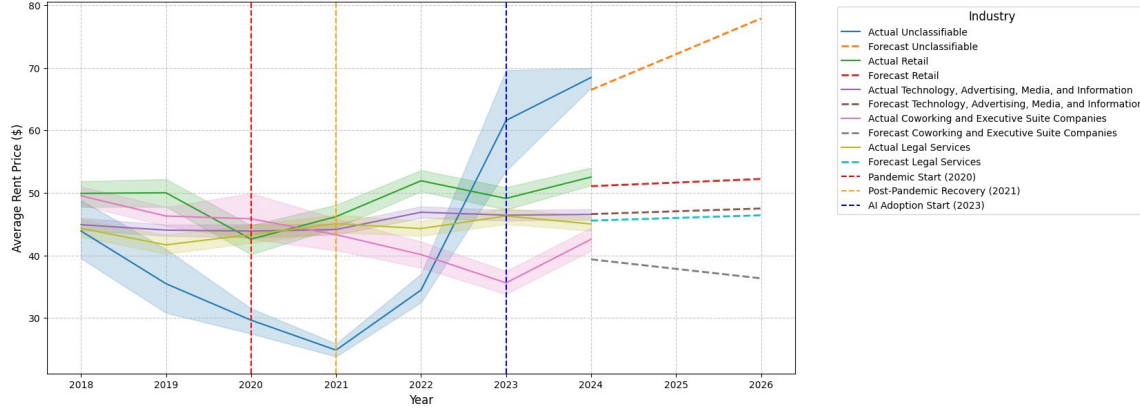

- Optimize their leasing strategy in High-Rent, Low-Vacancy markets
- Invest in Emerging Growth Markets with Low Unemployment

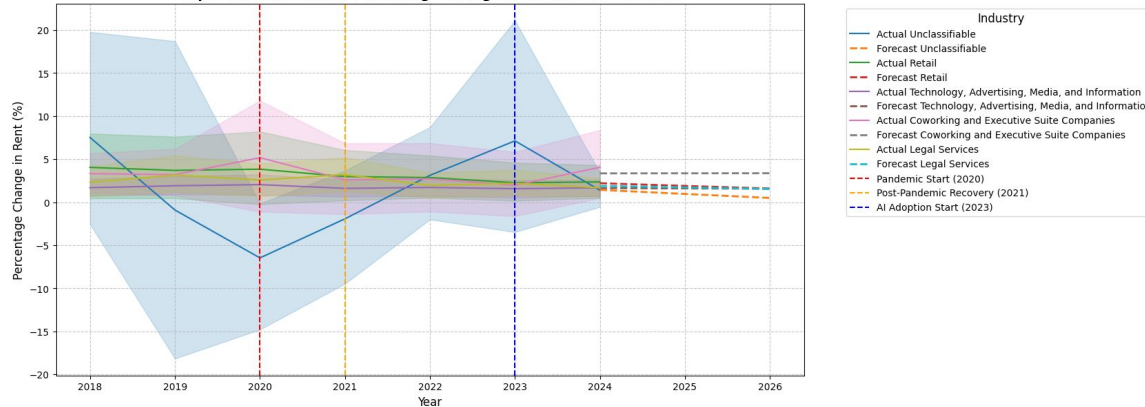

Negative Relationship between Unemployment Rate & Available Space

Prediction Analysis: Unclassifiable & Coworking/Exec Suite Industries could grow in rent for the next 3 years

Top 5 Industries: Rent Trends and Future Predictions

Top 5 Industries: Rent Percentage Change and Future Predictions

Savills should:

- Expand Investment & Leasing in Coworking and Executive Suites
- Target High-Growth, Volatile Industries such as Unclassifiable

Thank You!
